DESCRIPTION

Great beauty and highly recommended route. You need to be in good shape to enjoy it. In summer better to start early to avoid the heat of the day. Beautiful views, very quiet roads and good pavement except for Almedijar mountain pass descent, but the views are so great that is worth sacrificing 6 km of a irregular road surface. Eslida is a good point to recover strength and it is a meeting point for cyclists cycling through Sierra Espadán.

CULTURAL AND TOURIST PLACES

Sierra Espadan. This Natural Parc located at the South of the Province of Castellon occupies 31,180 hectares. The Cork oak woods are the most representative ecosystem due to their uniqueness and good conservation. Do not miss villages as Almedijar and Eslida.

Segorbe. The village of Segorbe is immersed in a fertile plain, washed by the Palancia river. Its medieval layout conceals several architectural gems, like the cathedral, and the vestiges of the ancient Wall and the remains of the medieval castle.

STOP & GO

Legend

- Drinking fountain
- Restaurant-Bar
- Repair and cycling shop
